EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science | GPA: 3.65/4.00

Dec. 2025

Atlanta, GA

EXPERIENCE

Young Corporation

Lead Software Developer

May 2026 – Present

Norcross, GA

- Architect automated estimation system to support and marketize proprietary construction products
- Build software that automates construction processes, reducing manual staff workload and increasing efficiency
- Design internal tool integrating AI-assisted workflows for estimation and operational automation

HyberTec LLC

Founder and Lead Developer

Apr. 2026 – Present

Cumming, GA

- Founded and led a software services company delivering SaaS products and custom solutions to businesses
- Engineer platforms including POS systems, waitlist managers, scheduling tools, and business automation
- Develop full-stack web solutions for restaurants, salons, real estate agents, and education businesses

Prime Academy

Software Engineer Intern

Jan. 2026 – May 2026

Chantilly, VA

- Designed and maintained internal software systems supporting student performance analytics
- Built tools to process assessment data and automate academic reporting

Georgia Tech Research Institute (GTRI)

Embedded Systems Intern

Aug. 2024 – Dec. 2025

Atlanta, GA

- Reverse engineered embedded firmware using Ghidra to reconstruct high-level logic from compiled binaries
- Constructed side-channel attack research to identify unintended information leakage during hardware execution
- Evaluated mitigation strategies against physical attack vectors affecting embedded systems security

National Science Foundation

Data Analyst Intern

Aug. 2023 – Dec. 2023

Atlanta, GA

- Modeled and simulated geospatial soil datasets to analyze environmental conditions in Turkey
- Applied machine learning techniques to identify anomalies and outliers in ground motion datasets
- Processed and evaluated large-scale environmental data to support predictive analysis using python scripts

PROJECTS

Takeoff Estimator | JavaScript, Rust, Python, PaddleOCR, Node.js, Tauri

May 2026

- Engineered an estimation platform automating construction takeoff workflows from project plans
- Reduced manual estimation effort through OCR, document parsing, and automated quantity calculations
- Deployed production-ready software for internal and external users

Report Generator | Python, JavaScript, Node.js

Apr. 2026

- Built an automated reporting pipeline integrating ClassMarker and Google Sheets APIs
- Eliminated repetitive manual grading system through data scraping and report automation

RestBroker | Python, JavaScript, Node.js

June 2026

- Developed an on-demand staffing platform connecting restaurants with temporary service workers
- Integrated booking systems, POS workflows, and scheduling features into a unified operational platform

SKILLS

Languages: Python, Java, C, JavaScript, SQL, Bash, Assembly, HTML/CSS

Domains: Software Engineering, Cybersecurity, Networking, Linux Administration

Certifications: CompTIA Security+ (Expected July 2026), Linux+ (Expected Dec. 2026)
